Subject: Olin dw well data

ATTACHMENT: Olin dw wells Data Tables nd.xlsx

Hi Jim -Here is the revised Olin table with your suggestions. There were a few instances where the chemical was detected in the sample, but also in the associated blank. All of those were considered ND, as well as all with U or UJ qualifiers. Let me know if you have any other questions/changes. Heather

Hi Heather - I like the format of the table, however could you please make the following changes;

Remove the yellow highlighting.

For all compounds not detected above the MDLs, please remove the MDLs in the table and simple report results as "ND", and add a key for ND below as "not detected above the method detection limit."

Yellow highlight the detections above the MDLs.

Also, please let me know if your team agrees with the proposed locations and analyte list for the pending private well monitoring.

Thanks -
Jim

Hi Jim - attached is the latest version of the residential well sampling data with the new information from Olin added in (and green highlighting from prior table removed). Please let me know if you need anything further on this one.
Heather
